

Amendments To The Specification

Please replace the paragraph on page 13, lines 6-20 with the following amended paragraph:

[0030] The video recorder 10 may interface with other means for sensing events. The video recorder 10 could interface with the door switch and/or the pressure pad (shown collectively as reference numeral 44) to detect motion in the door 66. The set 16 of rules could specify what conditions of the door switch and/or the pressure pad that activate the video recorder 10. The video recorder 10 could also interface with the Heating, Ventilation, and Air Conditioning (HVAC) system 42. When an exhaust fan [[76]] operates, the exhaust fan [[76]] may create motion in the tree 68. The set 16 of rules, then, could specify that motion in the tree 68 is ignored while the exhaust fan [[76]] operates. Suppose, too, a sign [[78]] hung from a ceiling sways when the exhaust fan [[76]] operates. The set 16 of rules could specify that when the exhaust fan [[76]] operates during non-business hours, the motion of the swaying sign [[78]] is ignored/acceptable. The set 16 of rules may even proactively shut down the exhaust fan [[76]] to verify that the motion is not caused by an intruder taking advantage of the rule. The set 16 of rules could further specify that motion is ignored when sound frequencies of a lawn mower are detected. The video recorder 10 interfaces with these means for sensing the event and initiates the video data 18 and/or the audio data 22 of the event (*e.g.*, motion in the door 66).
